According to the data from Ankura, there are 2,435 municipal cases. However, there is not a 1-to-1 correspondence between the number of cases and the number of municipalities litigating. Thus, while not shown above, there are approximately 3,323 litigating counties and cities in every state, Puerto Rico, and D.C. (This count includes all political subdivisions within the jurisdictions of the Tennessee district attorneys general that filed suit.) These 3,323 entities represent 9.6% of all municipalities, counties, or their equivalent in the United States, including Puerto Rico *municipios*, but more than half of the U.S. population.
